Non-GAAP Measures and Guidance

Non-GAAP Measures

This presentation contains certain financial information that has not been prepared in accordance with Generally Accepted Accounting Principles (GAAP). Management uses these non-GAAP financial measures internally in analyzing the Company's financial results and believes they are useful to investors, as a supplement to GAAP measures, in evaluating the Company's ongoing operational performance. This information should not be considered a substitute for any measures derived in accordance with GAAP.

Non-GAAP Guidance

The Company does not reconcile its forward-looking estimates of non-GAAP operating margins to the corresponding GAAP measures of GAAP operating margin due to the significant variability of, and difficulty in making accurate forecasts and projections with regards to, the various expenses it excludes. For example, future hiring and employee turnover may not be reasonably predictable, stock-based compensation expense depends on variables that are largely not within the control of nor predictable by management, such as the market price of 8x8 common stock, and may also be significantly impacted by events like acquisitions, the timing and nature of which are difficult to predict with accuracy. The actual amounts of these excluded items could have a significant impact on the Company's GAAP operating margins. Accordingly, management believes that reconciliations of this forward-looking non-GAAP financial measure to the corresponding GAAP measure are not available without unreasonable effort. All projections are on a non-GAAP basis.
